

Can I bring my iPhone to Solavei?

At our launch, the iPhone will be categorized as a “Usable Phone”. This means that if you have **an unlocked GSM version** of the iPhone, you’ll be able to put in a Solavei SIM card and get a quality voice and text experience, with data at 2G speeds.

Is my iPhone a GSM version?

- If you’re currently with AT&T or T-Mobile, your iPhone is considered a GSM phone, and CAN accept a Solavei SIM card.
- If you’re currently with Verizon or Sprint, your iPhone is considered a CDMA phone, and will **NOT** accept a Solavei SIM card.

GSM iPhone
(AT&T or T-Mobile)

CDMA iPhone
(Verizon or Sprint)

Keep in mind that the Solavei Community mobile app will only be accessible on Android devices, not on the iPhone. However, on a GSM iPhone you can still access the Solavei Community through your browser.

How do I unlock my iPhone?

Call your current provider to request this.

Anything else I need to know?

Once you’ve signed up for Solavei service, be sure to visit our [Online Support Community](#) and follow the steps [in this link](#) to configure your settings.
